

IMPROVE ENERGY AND WASTE EFFICIENCY IN SHOPPING CENTRES

Are you running a shopping centre and facing the challenges of:

- Managing utility costs - energy, waste or water?
- Managing space for waste facilities?
- Measuring energy and waste performance?
- Improving your environmental credentials for stakeholders?

Energy Conservation's **Efficient Shopping Centre Program** enables centres to meet these challenges, and with government sustainability initiatives, our support may be COST FREE.

OUR EFFICIENT SHOPPING CENTRE PROGRAM PROVIDES:

Advice

- How to save utility costs
- Tenant communications to improve waste processes
- Diagnostic audits for energy savings and waste management
- Actions to improve sustainability

Measurement

- Waste and energy bill reviews
- Waste output and energy consumption (NABERS Verified¹)
- Benchmarking against peers

Funding

- Free services are available, thanks to funding support from NSW and Federal governments
- Equipment rebates for energy efficient lighting, HVAC and recycling equipment

OUR ACCREDITATIONS AND PROGRAMS:

NSW Bin Trim - [See here](#)

NABERS Waste - [See here](#)

NABERS Energy & Water - [See here](#)

Accredited Certificate Provider - funding energy efficiency rewards under the NSW and Victorian Energy Savings Schemes.

¹ NABERS (National Australian Built Environment Rating System) is an independent, government managed system for measuring building sustainability. Nearly 80% of office space in Australia is NABERS rated, and the system is now expanding to shopping centres.
